

70421 SOLENOSTOMUS PARADOXUS

type
T122S

dimensions
62-16-145

lovingly handcrafted
limited edition 100 pcs

material

front and temple tips genuine
cellulose acetate, 8mm.
hinge components pure titanium.
surface blasted.

UV400 australian standard
anti-reflection coated PA-lenses.

quite often the special shape or the colors of an animal appear to be clearly visible and striking for the human eye, but provide perfect camouflage for the animal in its natural habitat. the name harlequin ghost pipefish hints to the stark contrasts and the flamboyant coloration of this peculiar reef dweller.

pipefish float in the groundswell, head down, their movements appear to be fluid and slow, almost like being dragged along with the swell. the fuzzy outline and the striking colors help them to blend in, they look exactly like the seaweed they live in.
